

Energy & Emissions

We are pleased to say that we exceeded all three of our previously announced public-facing energy and greenhouse gas (GHG) emissions goals for 2021.

PREVIOUS GOALS

10% decrease in facility energy consumption by 2021
(2016 baseline)

15% increase in mpg in private fleet by 2021
(2018 baseline)

10% improvement in cube utilization by 2021
(2018 baseline)

RESULTS

51% decrease in facility energy consumption by 2021

25% increase in mpg in private fleet by 2021

18% improvement in cube utilization by 2021

TOTAL ENERGY USE

1,615,565

gigajoules (total energy consumed in 2021)

63.7%
grid electricity

1.4%
renewable sources

DOWN FROM LAST YEAR

13% decrease in energy consumption since 2020 (kWh)

11%
GRAND & TOY

13%
OFFICE DEPOT
